Re: National Institute of Food and Agriculture Hall of Fame Award – Endorsement Letter

Dear Kelly Sprute,

I Fernando Huerta CEO of Organiko Latam Distributor for the technology Kyminasi Plan Booster for the South America continent and I would like to acknowledge Mr. Fulvio Balmelli for being the inventor of this technology, which we have been distributing in South America for 3 years now, with amazing results, with no doubt that this technology is going to save the agriculture industry for a better and healthier planet. Mr. Balmelli, discovered a new science called Cytoalgorithms, a science that is still unknown to the world today but is becoming more known day by day.

This letter is to provide all my support and endorsement to Mr. Fulvio Balmelli for his hard work all these years to provide a viable vital solution for one of the most important problems that are happening on our planet.

Sincerely,

Fernando Huerta

CEO Organiko Latam
